

## Material Processing Alliance

**Stellar Manufacturing and Bepex International have joined together** to create a compelling solution for companies who require solid material processing for their products. **Stellar provides superior contract manufacturing services** for solid particle products, and **Bepex is an innovator in industrial process development technology and equipment manufacturing.**

## Client Benefits

Clients placing work with us leverage the combined expertise of both industry leading organizations, **Bepex as the technology experts and system provider, and Stellar as the processing service provider and project manager.**

Reliable process development and optimization is now achieved more productively than ever before through the combination of Bepex and Stellar expertise. These benefits directly transfer to clients in the form of **higher quality products and more effective use of resources.**

## Bepex International

Bepex is a recognized industry leading process equipment manufacturer of **Agglomeration, Compaction, Milling and Thermal Technologies** used widely in the **Chemical, Mineral and Food Industries.**

We operate a **Process Development Center** where quick, efficient evaluation of your material allows us to determine the best path forward towards the commercialization of our customers products.

## Stellar Manufacturing

Stellar provides a variety of **tolling services “from powder to product”** to meet the diverse needs of many industries.

- **Compaction Granulation** - 70 mesh to 1/2" with custom sizes available
- **Briquetting** - 50, 75, 150, and 300-ton compaction systems
- **Tableting** - 250 mg to 1200 gram ranges with custom sizes available
- **Blending and Mixing** - Ribbon, paddle, V, dual cone, and continuous blenders
- **Filling and Packaging**
- **Warehousing**
